

Areas of sequestration map

CC3

In this section please include a map of your farm to identify areas of sequestration. These may include planted forest blocks, native bush and scrub blocks and also other areas of woody vegetation such as waterway plantings and shelter belts. A useful way to do this is on a copy of your farm map or using an aerial photograph. Mapping can also be done online using various free tools and then printed out. These tools can also help to calculate the size of different areas.
